

TRESPA INTERNATIONAL

Trespa International

Trespa International BV is a world leader in the development, manufacture and supply of high performance, high quality panels for exterior cladding, decorative facades and interior surfaces. Using proprietary technologies for the production of exceptionally durable products, Trespa strives to set new high standards in building, personal lifestyle and care for the natural world. Trespa panels meet key safety and environmental standards for building projects. Trespa materials are manufactured and tested to the highest national and international standards. Trespa provides architects, designers, installers and users with innovative, aesthetically pleasing and high performance solutions to meet virtually any specification for almost any application.

Trespa has sales organizations in all major countries and continents throughout the world – complemented by a network of local distributors.

TRESPA®

Trespa Meeon

Trespa Meeon is a flat panel, based on thermosetting resins, homogeneously reinforced with wood based fibers and manufactured under high pressure and at high temperatures. The panels have an integrated decorative surface using proprietary EBC technology. Trespa Meeon is used for vertical applications like facade cladding, balcony panelling and a wide range of other exterior applications.

Trespa Meeon is extremely weather resistant. Neither sun, rain – including acid rain – nor moisture have any effect on the panel’s surface. Both the UV resistance and color stability of the vertically applied decorative surface comply with the highest score classification 4-5 measured with the grey scale according to ISO 105 A02. Therefore colors will not change significantly for at least ten years, even under the most severe climatic conditions, or in heavily polluted industrial areas.

Trespa Meeon is highly suited for ventilated facade systems. These “breathing” or envelope systems offer possibilities for high insulation values, perfect building physics and contribute to a healthy indoor climate. This provides a living environment for sustainable building applications.

Trespa Meeon architectural panels are available in a wide choice of standard colors, effects and finishes – or they can be custom-made. These panels have the ability to transform, enhance or even add new dimensions to any design. Trespa Meeon is not just beautiful – it is exceedingly robust and durable so today’s vision will remain tomorrow’s reality.

Trespa Virtuon

Trespa Virtuon is a panel with an integrated decorative surface for use in demanding interior applications, with exceptional performance in terms of hygiene, cleanliness and design. Trespa Virtuon panels are manufactured using a proprietary EBC process, producing a surface that can be maintained with minimum effort - even in the most challenging environments.

Impact and moisture resistant, Trespa Virtuon combines the durability of HPL Compact panels with a closed, impermeable surface which is easy to clean and resistant to cleaning agents and disinfectants. Trespa Virtuon has proven effectiveness in maintaining a healthy environment.

Trespa Virtuon is available in a wide range of brilliant colors and textures as well as special effects such as metallic colors. Trespa Virtuon can be easily machined and installed in many different ways. Trespa Virtuon enables the user to create an interior with a personal touch – with the right atmosphere and the desired degree of comfort.

Trespa TopLab^{PLUS}

Trespa TopLab^{PLUS} is a self-supporting flat panel, based on thermosetting resins, homogeneously reinforced with wood based fibers and manufactured under high pressure and at high temperatures. The panels have an integrated decorative surface using proprietary EBC technology. This process ensures that each panel is pore free and resistant to a large number of aggressive chemicals, easy to clean, disinfect and maintain.

Trespa TopLab^{PLUS} offers a unique combination of properties. Trespa TopLab^{PLUS} provides a surface impermeable to bacteria, molds or micro-organisms. Water-resistant and easy to clean or disinfect, Trespa TopLab^{PLUS} is resistant to the effects of wear and tear. Aggressive chemicals will not mark a Trespa TopLab^{PLUS} surface – if cleaned within 24 hours.

These properties make Trespa TopLab^{PLUS} highly suitable for use in medical and clean room conditions. Trespa TopLab^{PLUS} is ideal for use in labs used by different working groups, such as in educational institutions and industrial environments. Thanks to the large size of Trespa TopLab^{PLUS} panels, the installation of large work tops with fewer joints is possible which fits the requirement for hygienic solutions.

Trespa TopLab^{PLUS} is available in a range of colors to suit the specific needs of the facility's users and brings additional benefits in terms of aesthetics. It can be used in the most challenging environments for many years without losing its good looks or functions.

Trespa Athlon

Trespa Athlon panels are specifically designed for interior applications subject to intensive use. Trespa Athlon is impact, scratch and wear resistant. Panels are easy to keep clean and as they do not absorb or retain moisture they can be cleaned frequently. Trespa Athlon retains its appearance for a very long time.

The combination of a solid, homogenous core with a hard surface based on melamine resins gives Trespa Athlon exceptional impact resistance. This is confirmed by its day-to-day practical use as wall cladding in public rooms and rooms susceptible to vandalism, sanitary cubicles or as bumper rails in hospital corridors.

Trespa Athlon is highly resistant to wear, making it ideal for installation where heavy use and frequent cleaning are expected. Trespa Athlon is commonly used as office or laboratory worktop.

Available in a range of plain colors and patterns and in two different surface structures, Trespa Athlon can be used singularly to create a stunning, harmonious or even a playful environment.

Trespa Meeon can be evaluated for U.S. Green Building Council (USGBC) credits under the USGBC LEED® Rating System. Meeon is also GREENGUARD Indoor Air Quality Certified® and has achieved GREENGUARD Children & SchoolsSM Certification.

Trespa International B.V.

Trespa International B.V. specializes in high quality panel material for facade cladding and interior use. Trespa has both the expertise and the means to develop products for specific segments of the market. Trespa is continually looking for ways to protect the environment even more effectively.

Trespa guarantees quality of both products and services. We offer our customers optimal technical support as well as straightforward documentation. Proof of this approach is the award of the ISO 9001 and ISO 14001 certificates.

Whatever your requirements, Trespa offers a full support service. Please contact us for further information.

Conditions of Sale

To all our offers, quotations, sales, deliveries and supplies and/or agreements, and to all related services and activities the

Trespa International B.V. General Conditions of Sale apply, filed at the Venlo Chamber of Commerce on 11 April 2007, registered under number 24270677, and appearing on the website at www.trespa.com. The text of these General Terms and Conditions will be sent to you upon request.

Responsibility

We believe all information in this publication to be correct at the time of printing. It is intended as information concerning our products and their application possibilities and is therefore, not intended as any form of guarantee with regard to any specific product characteristic.

Colors

The colors in this document are printed, and therefore, may vary slightly from the original Trespa panel colors with respect to gloss, color shades and surface texture. Original samples are available on request.
