When you desire more depth, think Trespa

TRESPA®

TRESPA®

Depth brings a
facade to life!

Leading light

Falling light brings facades alive with ever-changing movement.

Tilt, turn and curve panels and watch light dance playfully across your design.

Give your design full play

Three dimensions

It takes three dimensions to transform ordinary into extraordinary.

Add depth to your ideas

Trespa Meteon exterior panels help unleash your creativity.

Light up facade design

A building is a three-dimensional object. Why cover it with a two-dimensional facade? Using Trespa Meteon exterior panels to create a third dimension extends your imagination. It adds dramatic depths, subtle nuances, surprising movement and an ever-shifting play of light and shadow over the building's facade. By incorporating Trespa Meteon exterior panels into your design, by adding special joint elements and structures, you can design a facade that connects with people on an emotional level.

We call this process Trespa Perspectives. Trespa Perspectives isn't a product. It's a source of inspiration for architects and designers, a new way of looking at buildings. How you express its depth is limited only by your imagination.
