Bringing play to life.

Playtop Limited is pleased to offer areas that carry heavy people and slip resistance.

Playtop Walkway® provides a comfortable, quiet and highly durable walking surface for all heavily used outdoor areas. It is ideal for use on patios, walkways and as a cross over area for sports pitches and facilities. Playtop Walkway® is particularly effective on Golf courses, where its rubber construction is specially designed to take a studded shoe and resist permanent indentation or damage. It can also be used indoors in locker rooms, passages and even the pro's shop.

Playtop Walkway® offers clients:

- **Long life**
- **Low maintenance**
- **Choice of colours**
- **Comfort underfoot**
- **Low noise levels**
- **All weather safety**
- **Fast drainage**

Playtop Walkway® can be found at some of the UK's top golf courses.

- **Wentworth Golf Club**
- **Queenwood Golf Club**
- **Beaconsfield Golf Club**
- **North Berwick West Links Golf Club**
- **Halifax Bradley Hall Golf Club**
- **Stranraer Golf Club**

to offer a solution for surfacing outdoor pedestrian traffic and require good drainage

Construction

Playtop Walkway® forms a continuous, joint free surface which can be laid in any shape, either on a purpose built base or over existing tarmac or concrete pathways.

It can also be laid directly onto a compacted crushed stone base, thus offering flexibility and cost efficiency if developing new areas of pedestrian traffic.

Playtop Walkway® is made from rubber granulate and polyurethane binders, which have been specially developed by Playtop and our partners. The materials are mixed on site and installed by highly skilled teams to ensure the highest standards of quality and consistency.

The surface is resilient, comfortable to walk on and being made of rubber is excellent at absorbing sound.

Experience

We have developed Playtop Walkway® utilising over 25 years of experience in the sports and play markets and therefore know what it takes to make a surface that lasts.

It is extremely tough, and designed to withstand the pounding of spikes and studs found on sports footwear.

Playtop® is a porous material and therefore contends easily with rainwater and run off and requires very little maintenance. We advise a six monthly powerwash to ensure the voids are kept clear of moss or silt build up, but that should be sufficient to keep a clean and smart path in order.

Playtop Walkway® is available in a range of tones that will fit in with any surroundings. We often mix special blends to match club colours and maximise economy.

The groundwork for **Playtop's** success began over 25 years ago when we installed our first playground on a housing estate in Loughborough, England, which is still in use today.

Playtop® is the most advanced product in its field. After holding the UK market leadership for over 25 years, it is now marketed by trained and licensed installers in more than 25 countries. Today, more than 1.5 million square metres (16 million square feet) of **Playtop®** have been installed worldwide.
